Managed Detection and Response for SMBs

MSPs need to provide reliable security and compliance solutions for their SMB clients but it needs cloud integrations and it can't break the bank.

This is where SOCSoter comes in!

Why MSPs serving the SMB Community should choose SOCSoter:

- Channel-only

- Detect malicious and/or inappropriate activity

- Comply with regulations and data privacy laws

- US-Based 24/7 SOC

- Alerts are reviewed by certified SOC analysts

- Utilizes a centralized portal offering dashboards and reporting

- Integrates with most cloud platforms

SOCSoter is a one-stop, channel-only cybersecurity solution for small to medium-sized businesses. Other services include:

- Vulnerability Monitoring
- Enterprise Risk Management
- Compliance Monitoring
- Penetration Testing
