MANAGED CLOUD SIEM

Built for the SMB. Now service providers can protect critical client infrastructure no matter where it lives with centralized access and 24/7 cloud systems monitoring.

- Approachable Pricing
- Comprehensive Coverage
- Dedicated Management Team
- 24/7 Cloud Monitoring
- Compliance Reports

The ultimate layer of protection for the SMB.

Built in the cloud, exclusively for the MSP.

We make cloud deployments simple...

1. Integrate the stack of cloud services you are already selling and have them monitored by a world class Security Operations Center.

2. Immediate application of rules and evaluation against current and always-updating threat intelligence

3. Our certified SOC analysts investigate alerts to ensure only qualified ones get escalated

4. Live logs, exports and metrics are collected and easily organized for reporting in a single point of access portal

5. We help you bring value to your customers!

SOCSoter
